

NICHOLS - BULL EXTRA

IF YOU WANT THE VERY BEST!

We are offering the yearling herd bulls that we've used on our registered cow herd this year. These BEEF bulls have amazing weaning weights, rates of gain, yearling weights and the best EPDs in the beef industry.

They're the "best of the best"— that's why we used them. Their sons will be for sale in our bull test barn next year and their daughters will be in our pastures.

Nichols Farms was the first herd (since 1987) to utilize ultra-sound technology to measure IMF% (marbling) and lean yield (yield grade). This "head start" on collecting and using this carcass and feedlot data has served us well.

Nichols' Value Added Customer Programs feature Genetic

Source Feeder Auctions and Genetic Source Bred Heifers.

Nichols Farms is the clear leader in utilizing DNA technology. The past five years **every Nichols herd sire** has been evaluated with DNA for the entire suite of traits including feed efficiency. All Nichols Angus bulls selling are AM, NH, CA and MI non-carriers by pedigree and/or DNA test.

The past 40 years over 20 Nichols Bulls have stood in major A.I. Studs. Many of them were offered in the Bull Extra sales.

These bulls will be sold on a "first come - first served basis". Call or visit - select one or more of these bulls to work in your herd. Semen checked and ready to go. \$100 off the price, if you pick them up.
