Glossary of Items on Nichols Bulls

Breed: Angus, Simmental, SX, and DX Composites

Brand/Tag: Ear Tag, Brand, Tattoo & Name are the same.

Color: B-Black, BWB-Black-baldy, (may have other white)

Horn/Poll: P-Smooth Polled, S-Polled with scurs

Birth date: Birthday of animal.

Birth Wt.: Actual birth weight.

205 Adj.: Wean weight adjusted to 205 days of age

205 Ratio: An within-herd index of calf's weaning weight

Cum ADG: Average Daily Gain for the entire feedlot test period computed from actual weaning weight to yearling weight

EPDs: Expected Progeny Differences are estimates based on the data of the individual animal and his relatives in all the different herds across the breed's population. EPD's figures are in actual pounds, plus (+) or minus (-) for each trait. Those below would be minus (-) and those above average would be plus (+). You can expect these differences in the actual weight of your bull's calves. EPDs predict the transmitting ability of each bull when compared with the many thousands of bulls in each breed.

EPD Note: Nichols Angus are on an Angus Base. Nichols Simmentals, South Devon, and all Composite are on the Simmental base.

Color: hom is homozygous black, het is heterozygous red carrier

Carcass EPDs: Marbling: Intramuscular fat in the rib eye determines USDA quality grade, Prime, CAB, Choice, or Select BF: Back fat thickness in inches measured on the rib eye.

REA: Rib eye area in square inches measured at the 13th rib.

Calving Ease: Suitable to breed "heifers" or "cows".

Feed Efficiency Index: SmartFeed bunk system at Nichols Farms is used to measure individual feed efficiency on bulls and heifers. The feed efficiency on each bull: NEI (Nichols Efficiency Index) - \$ Index combining both Average Daily Gain and Relative Feed Intake for economic gain.

Health Shield

Bulls represented with the Nichols Health Shield Emblem represent bulls that are in the Top 30% of Nichols Genetic Evaluation for resistance to Bovine Respiratory Disease. The probability (In %) of a calf not being treated for respiratory disease post weaning.

Five, Fair-Fast-Easy Steps to Buy Your Nichols Bulls

1. As soon as you arrive at Nichols Farms (Iowa) register for your buyers # and get the bulls' performance records, EPDs, genomic profiles and carcass data.
2. Bulls will be penned by breed, by performance, and by price. A selector board will be posted by each pen with the tag/brand # of each bull in that pen.
3. At 1 PM the first selections will be made in buyer number order. Take the card that matches the bull(s) tag # you wish to buy.
4. In case another person selects a bull that you want to buy-you (and others) have the opportunity to bid on that bull. You will bid in \$50 increments against the person who initially pulled that card. If the person who pulled the card does not want to raise your (and others') bids, he or she has the opportunity to make another selection before any other bulls are selected from that pen. A Nichols Farms representative will be at each Selector Board to answer your questions and conduct the bidding. The only bidding will be between the people who want to buy the same bull on which a card has been pulled from the Selector Board.
5. When you make your bull(s) selection, write your name, address, and phone # on the card and give it to Lillian Nichols at the office.

Sale Terms and Conditions

Nichols will retain a 25% semen share interest in every bull that is for sale today.

Bulls will be semen checked prior to pick up or delivery. Nichols Farms offers death and loss of use warranty on their sale bulls. This warranty must be purchased at time of sale. Bulls are guaranteed to service cows. Any bull that settles healthy cows by natural service or passes a fertility test made by a certified veterinarian mutually agreed upon by Nichols Farms and buyer shall be considered a breeder.

- Injury or disease to the animal occurring after the sale.
- Animals put in service or bred at less than 12 months of age.

\$ Value EPDs are \$\$\$ per head

- ◆ **Weaning Value (\$W)** calculates a \$ per head difference in expected progeny differences for weaning weight compared to progeny of other Angus sires.
- ◆ **Beef Value (\$B)** represents the expected average dollar per head difference in the progeny feedlot performance and carcass value compared to progeny of other Angus sires.
- ◆ **(\$C)** combines \$Maternal and \$Beef values

Feed Efficiency EPDs

SmartFeed bunk system at Nichols Farms is used to measure individual feed efficiency on bulls and heifers. As the data is gathered we have added three points of information on these Bulls.

Feed Efficiency Index: SmartFeed bunk system at Nichols Farms is used to measure individual feed efficiency on bulls and heifers. The feed efficiency on each bull: NEI (Nichols Efficiency Index) - \$ Index combining both Average Daily Gain and Relative Feed Intake for economic gain.

TOP TEN REASONS TO BUY A NICHOLS BULL

1. Maximize heterosis to take your calf crop and cows to next level.
2. Early adopter (1987) of ultra-sound and genomic profiles.
3. Can't attend? Take advantage of our sight-un seen guarantee.
4. We will notify our network of feedlots when you sell your calves.
5. Whether buyers or sellers we will help you buy or sell Nichols sired bred heifers or heifer calves at no cost to either buyer or seller.
6. Buy sons from the same hard working cows that have had 40 AI sires the past 60 years.
7. Health, Loss of use and Death Warranty available.
8. Volume discount and free delivery in continental United States.
9. \$100 discount if you pick up and pay for your bulls - WHEN YOU ARE READY for them.
10. For 70 years we've been open every day except Sunday.

POTTER LEOMA A91
NICHOLS RADIANT G63

What is a Nichols Hybrid Bull?

Nichols' Hybrids are the result of crossing two Registered Purebred parents to combine the best traits of two breeds. Their predicted EPDs are as accurate as purebreds.

A Nichols Hybrid bull's heterosis (cross bred vigor) is transmitted to his offspring. Plus, his calves are more uniform than back crossing purebreds. Virtually all poultry, swine, and grain genetics are the result of systematic composite breeding.
